Task:

1. Read the text.

2. Afterwards you will do a presentation about this tourist attraction.

Think about what you want to tell the others about it. Would you like to visit this attraction or not? Why?

Take notes for your presentation in the box on the right (only single words).

The Everglades National Park

The Everglades National Park is an adventure traveler’s dream. With a size of 2,400 square miles, the national park is home to thousands of wild animals such as tropical birds, alligators, and even panthers.

On average one million people visit the Everglades National Park each year.

The Everglades National Park offers tourists a lot of different activities: You can go fishing or canoeing, you can do some bird-watching activities or you can take a boat or a bike trip with a park ranger. You might even want to sleep in a tent and do some camping.

If you want you can also visit the Miccosukee museum in the park where you learn about the culture and traditions of the Indian Miccosukee tribe. In the Miccosukee Indian village they also do dangerous alligator shows.
